Matheus Sobreira Farias

Room 3.410, Science & Engineering Complex, 150 Western Ave. Allston, MA 02134 matheusfarias@g.harvard.edu | matheussfarias.com

EDUCATION

Harvard University Cambridge, MA

Ph.D. in Electrical Engineering

2021-Present

Working on efficient hardware architectures for machine learning. Advised by Prof. H. T. Kung (link)

Federal University of Pernambuco

Recife, Brazil

B.Sc. in Electronics Engineering

2016-2021

1st out of 40 students, GPA 8.90/10. Senior Thesis: iOwlT: Sound Geolocalization System (link).

RESEARCH

Current projects and other information can be found here.

Computing in Memory

2021-Present

Harvard University

Working on the algorithmic level perspective to allow efficient deep neural networks under the crossbar architecture. Particularly interested in ways to avoid bottlenecks on the architecture such as energy consumption due to data conversions, wire resistance impact, sneak paths, and negative weight representation.

iOwlT: Sound Geolocalization System (link)

2019-2020

Federal University of Pernambuco

Developed a system using neural networks, adaptive filtering and real-time processing in FPGAs to geographically track sound events and then determine the position of gun shooters on a mobile application by Bluetooth connection. Earned 3 international awards, placing Top 0.7% at InnovateFPGA competition in China.

Lock-in: Nano-Volt Signal Amplifier (link)

2019-2020

Federal University of Pernambuco

Design and optimization of a phase-sensitive lock-in amplifier circuit for the Magnetism and Magnetic Materials' group led by the former Minister of Science and Technology of Brazil Prof. Sergio Rezende to be used for investigating magnetic properties of thin films such as IrMn/Py using MOKE technique.

iTraffic: Smart Semaphore Network (link)

2017

Federal University of Pernambuco

Design and proposal of an internet of things intelligent system to dynamically choose traffic lights timing to optimize vehicle flow on urban roads using genetic algorithm. Achieved 130% improvement in the average speed of cars in tested tracks.

Maracatronics: Robotics Team (link)

2017

Federal University of Pernambuco

Part of collective autonomous soccer sub-team, acting on robots control on Tiva-C microcontroller, computer vision mapping and tracking, and intelligent robots decision-making strategies.

PUBLICATIONS

*denotes equal contribution

CONFERENCES

2. 2019 International Conference on Field-Programmable Technology

Tianjin, China

1. VII Brazilian Symposium on Computing Systems Engineering

Curitiba, Brazil

TEACHING

Harvard University	
CS205 – High Performance Computing	Spring 2023
Federal University of Pernambuco ES456 – Machine Learning	FALL 2023
MA326 – Complex Variables and Applications	2018-2019
FI007 – Physics II: Gravitation, Waves and Thermodynamics	2017-2018
MA026 – Calculus I: Limits, Derivatives and Integrals	FALL 2016
Work Experience	
Neurotech Machine Learning Intern Served as workshop instructor and collaborated adding +5 machine learning algorithms to production.	Recife, Brazil 2020–2021
Espaço Diferencial Co-Founder and Professor Idealized the course, a non-profit school to support underpriviledge students in basic engineering classes. Managed planning that turned to impact over 200 students with a team of 10 professors. Taught Physics at the undergraduate leads to the course, and the course of the course	
Awards and Recognitions	
Behring Foundation Fellowship Harvard University Honored by the Behring Foundation with a fellowship to cover my first year of graduate studies at Harvard.	2021–2022
Silver Award at InnovateFPGA 2019 Contest (Grand Finals) Tianjin, China 2nd out of 270 teams with iOwlT: Sound Geolocalization System.	2019
Silver Award at InnovateFPGA 2019 Contest (Regional Finals) Americas 2nd out of 40 teams with iOvelTr. Sound Cooleanlination Systems	2019
2nd out of 40 teams with iOwlT: Sound Geolocalization System.	2010
Community Award at InnovateFPGA 2019 Contest Americas Elected as best project by the community with iOwlT: Sound Geolocalization System.	2019
PIBIC/CNPq funding to do research Brazil	2019
Awarded by national government funding to do research with Lock-in: Nano-Volt Signal Amplifier.	
5th Place at XVI Latin American Robotics Competition Latin America In the Small Size League category of autonomous football soccer with Maracatronics: Robotics Project.	2017
1st Place at Embedded Systems Regional Contest Brazil	2017
1st out of 14 teams with iTraffic: Smart Semaphore Network.	
Honorable Mention at Brazilian Physics Olympiad Brazil One of the 180 medalists over more than 300,000 contestants.	2015
DIVERSITY, INCLUSION & OUTREACH	
• Author of the Experimental Exam for the Brazilian selective to the International Physics Olym	piad 2023
Organizer of the International Young Physicists' Tournament Brazil	2023

 Leader of the Diversity & Inclusion branch at the Harvard Brazilian Association 	2022-2023
Judge for the 4th Brazilian Physicists' Tournament	2021
• Officer of the School of Engineering and Applied Sciences at the Harvard Brazilian Association	2021–2023
 Judge for the International Young Physicists' Tournanment Brazil 	2021–2023
Talks	
Futuras Cientistas – Ministry of Science, Technology & Innovation of Brazil (link) Technology and its Social Impact	2023
Federal University of Pernambuco Journey to become a Ph.D student	2022
PodCast Ph.D nos EUA (part 1) (part 2) Journey to become a Ph.D student	2021
